

EYELASH LIFTING

AFTERCARE

Because beautiful lashes aren't just made in the salon

Who doesn't love a lash lift? It's the perfect way to enhance your eyes and natural beauty. After all, they do say that the eyes are the window to the soul so who wouldn't want to accentuate those pretties?

As important as the actual treatment is, ensuring you are following the correct home aftercare for your lift will be essential to optimum lash health and a lasting lift. The eyelash lift will last the duration of the natural cycle however, longevity will always vary from client to client.

Please find below Elleebana's top aftercare tips.

1. Avoid Moisture, excess steam, and water for the first 24 hours

For the first 24 hours after the treatment, your lashes are still quite delicate and malleable. Ensuring that you are not exposing your lashes to excess steam or moisture will prevent the lash lift from dropping.

2. Do not rub or play with your lashes

It can be incredibly tempting to touch, play and admire your beautiful new lashes, we get it. However, try not to rub or play with your new lusciously lifted gems. Natural oils from your hands and skin can alter the structure of the lash lift and if you are playing with the lashes they may fall out prematurely.

3. Do not use shampoos, conditioners, makeups, creams, eye serums, or oils on the lashes or around the eye area for the first 24 hours

Using any of these products can encourage the color of the lash tint to weaken or the lash lift to relax.

4. Avoid using a strong eye makeup remover for 48 hours

This too may cause the lash lift to drop.

5. Try sleeping on your back for the first night to avoid lashes dropping on the outer corner

As mentioned, the lashes are still quite delicate and malleable for the first 24 hours try not to sleep face down and avoid wearing an eye pillow/mask the evening of your eyelash lift.

6. Use at-home treatments to help to keep your lashes conditioned and nourished between lifts.

This step is critical in keeping your lashes healthy for the duration of your lash cycle. Just like when you go to the hairdresser and have a treatment, it is a requirement that you use aftercare products to look after your luscious locks, why should our lashes be any different?
